finishes

metalcote™

is Victoria's premier specialist metal company

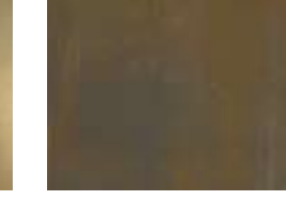

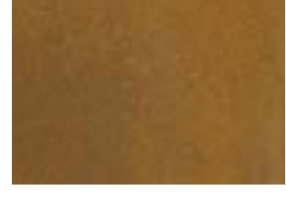

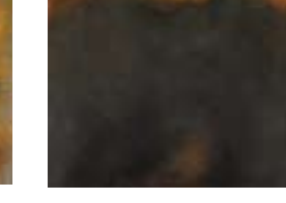

Locally based in Melbourne, Metalcote delivers a wide range of authentic metal finishes (using real metal) to add a distinctive and innovative dimension to any project. As a liquid application, Metalcote extends the design process to a new level. It allows seamless adhesion to a vast range of dynamic contours creating what is, in effect, a metal skin. Metalcote's range of finishes can be applied to most substrates including Acrylic, Ceramic, Concrete, Fibreglass, Glass, MDF/ custom wood, Perspex and Plaster.

These different treatments can also be fused so finishes are customised to suit your application, for example copper alloy or graphite brass. With the use of different application techniques, Metalcote treatments can be fashioned to form different patterns and create instant ageing textures, including patinas, rust and other surface effects. Metalcote will ensure your designs are noted for their style and distinctiveness. Typical applications to date have included shop fittings, doors, wall panels, corporate furniture, signage and sculpture pieces. Metalcote will stir your imagination and awaken your senses to the notion that anything IS possible with metal.

Metalcote can be adapted to suit any profile. Different finishes include Aluminium, Brass, Bronze, Copper, Graphite, Nickel, Rust, Stainless Steel and Zinc.

				
ALLOY GRAPHITE PITTED	ALLOY GRAPHITE MIX	ALLOY SHIMMER	ALLOY SMOOTH	ALLOY SMOOTH TILE
				
ALLOY TEARDROP	ALLOY WORM GRAPHITE FLECK	BRASS SMOOTH	BURNT BRONZE	BRONZE HEAVY GRAIN
